THE SUN

📍 Sunny Hills, grid square I21.

The Sun is an immersive wooden space crowned by a glowing sphere — a symbolic sun suspended above. At its heart hangs a fire-place that welcomes and warms everyone. We see The Sun as a light and soft space, away from intensity, to be with others or with oneself, to soften and drop into presence. There's a strong sense of light and illumination, in the structural and light elements of its design as much as in the philosophy of the piece. May the Sun support whatever needs to come to light and come to life there. Ultimately, this space is a celebration of light.

THE DROP

📍 Forest Cave, grid square J23

The Drop is a giant shiny suspended sculpture that looks like it's about to descend from space into the Alversjö playground — and when burners turn the lever, it sounds like it too. By day it gleams like an oil drop, futuristic and surreal; by night, silver/blue lighting gives it a water-like halo — mystical, hopeful, earthly and alien all at once. Switch the lights to yellow and red, and it becomes a burning flame.
